

UMESH IYER

Graduate Data Analyst | Python | SQL | Power BI | Tableau

umeshiyer2@gmail.com • +44 7818 920674 • United Kingdom — open for relocating • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Graduate Data Analyst (MSc Artificial Intelligence, Queen Mary University of London) with hands-on experience across the full analytics pipeline: Python ETL, SQL data modelling, and Power BI/Tableau reporting. Comfortable breaking ambiguous problems into clear, logical steps and translating technical findings into terms non-technical stakeholders can act on commercially. Cut pipeline runtime 95% and downstream reporting errors 25% in a live data function; looking to bring that same hands-on, detail-first approach to a growing data team — working closely alongside senior analysts to build deep working knowledge of a live operational stack.

CORE SKILLS

Programming: Python (Pandas, NumPy), SQL (PostgreSQL, CTEs, Window Functions), R

Data Visualisation: Power BI (DAX, Power Query), Tableau, Advanced Excel (Pivot Tables, XLOOKUP, Dashboards)

Data Engineering: ETL/ELT Pipelines, Data Modelling, Data Warehousing, API Integration

Databases: PostgreSQL, MongoDB

Cloud & Tools: Google Cloud Platform (GCP), Git, GitHub

Analysis & Maths: Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing, A/B Testing

EXPERIENCE

Data Analyst Intern — YCX | Remote / London, UK

Apr 2025 – Aug 2025

- Slashed ETL pipeline runtime 95% — from 4 hours to under 10 minutes — by engineering high-throughput Python pipelines orchestrated in n8n across multiple data sources, enabling same-day reporting for commercial decision-making.
- Automated manual reporting workflows, cutting analyst effort 30% and freeing up time weekly for ad hoc analysis and stakeholder requests.
- Strengthened data reliability for non-technical business stakeholders by 25% through automated validation and statistical consistency checks built across all ingested datasets.
- Streamlined delivery of query-ready datasets by scheduling automated refreshes via the Google Sheets API, translating ambiguous business requirements into structured data stakeholders could act on immediately.

PROJECTS

E-Commerce Sales Analysis | Power BI, DAX, Python, SQL

- Improved reporting efficiency 25% by building an end-to-end Power BI dashboard tracking revenue, profit margin, and AOV across 10K+ sales records, surfacing commercial trends in customer behaviour and product performance.

British Airways Customer Review Analysis | Tableau, Data Blending

- Identified key drivers of low service ratings across 1,000+ customer reviews by building an interactive Tableau dashboard blending seat comfort, entertainment, and regional data, delivering stakeholder-ready findings that directly informed service improvement priorities.

Event-Driven Public Sentiment Analysis (UK) | Python, VADER NLP, Power BI

- Quantified daily public sentiment shifts around a major UK policy event by building a Python/VADER NLP pipeline and visualising trends in Power BI, enabling event-level analysis for stakeholders.

EDUCATION

MSc Artificial Intelligence (Merit) — Queen Mary University of London, London, UK

Sep 2024 – Sep 2025

Relevant Coursework: Machine Learning, Statistical Methods, Big Data Systems, AI

BSc Computer Science (Merit) — SIES College of Science, Commerce and Arts, Mumbai, India Jun 2021 – May 2024

CERTIFICATIONS

- Business Intelligence with Power BI and Tableau – Udemy (2024)
- SQL Associate – DataCamp (2025)
